Summary

Digital Specialist Engineer Trainee at **Infosys**, working in the **Java Spring Boot** domain with hands-on experience in backend development and database-driven applications. Experienced in building REST APIs, authentication systems, cloud-deployed applications, and AI-powered solutions. Strong foundation in **Java, OOP, Data Structures, Algorithms, and DBMS**.

Experience

Digital Specialist Engineer Trainee Aug 2026 – Present
Infosys *India*

- Working in the **Java Spring Boot** domain, developing backend applications using Java, Spring Boot, Spring Data JPA, Hibernate, REST APIs, and MySQL.
- Developing RESTful services with **CRUD operations, pagination, sorting, validation, exception handling**, and relational JPA mappings.
- Working with layered backend architecture involving **controllers, services, repositories, DTOs, and database persistence**.
- Using **Git, JUnit, Postman, and debugging tools** as part of application development and testing workflows.

Projects

FoodFreaky – Co-Founder & College Food Delivery Platform | MERN 2025

- Co-founded and built a full-stack **food delivery platform for college students**, allowing users to browse food, place orders, track order status, and receive digital invoices.
- Designed and developed backend services using **Node.js, Express.js, and MongoDB**, implementing JWT authentication and role-based access control for users and administrators.
- Grew the platform to **1,000+ users** and generated **6L+ in revenue** through real-world food orders within the college ecosystem.
- Owned backend development and production deployment using **DigitalOcean, Cloudflare, and Netlify**, including automated PDF invoices and transactional email notifications.

Cloud Intelligent Document Assistant (CIDA) | FastAPI, RAG, Gemini API 2025

- Built an AI-powered document assistant that enables users to **search, summarize, and ask contextual questions** about uploaded documents.
- Implemented a **Retrieval-Augmented Generation (RAG)** pipeline using document chunking, vector embeddings, and similarity-based retrieval.
- Integrated the **Google Gemini API** to generate responses grounded in relevant document context rather than relying solely on model knowledge.
- Designed asynchronous document-processing workflows and tuned **chunking and similarity thresholds** to improve retrieval relevance.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL
Backend: Spring Boot, Spring Data JPA, Hibernate, Node.js, Express.js, REST APIs, JWT
Databases: MySQL, MongoDB, PostgreSQL
Cloud & DevOps: AWS EC2, DigitalOcean, Docker, Git, GitHub Actions, Cloudflare
AI/ML: RAG, Vector Embeddings, Google Gemini API, TensorFlow, PyTorch
Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Education

VIT-AP University Amaravati, Andhra Pradesh
B.Tech in Computer Science Engineering | ***CGPA: 8.8/10*** *Aug 2022 – May 2026*

Achievements & Certifications

- **LeetCode:** Max Rating **1784**; solved problems across Data Structures, Algorithms, Dynamic Programming, Graphs, and SQL.
- **INSPIRE Programme (DST, Govt. of India):** Selected among the **top 1%** performers nationwide in Class X Board Examination.
- **Certifications:** GitHub Foundations; BlackBucks MERN Full Stack Developer.
